

YASHITA GAUR

AI Engineer | Applied ML, Computer Vision & LLM Systems

+91 9870551785 | yashitagaur09@gmail.com | linkedin.com/in/yashita-gaur | github.com/yashita72 | leetcode.com/u/yashita-gaur

PROFESSIONAL SUMMARY

AI & Data Science undergraduate (B.Tech, 2028) and ML Technical Lead with hands-on experience building and shipping end-to-end AI systems across computer vision, LLM-powered tools and data platforms. Internships at Bharat Electronics Limited (CRL), Bluestock and IBM SkillsBuild. Strong Python, algorithms and debugging fundamentals; implemented core ML/DL algorithms from scratch; built and evaluated agentic and LLM-based applications using the Claude API and FastAPI. Seeking an AI engineering role focused on building, testing and evaluating AI systems.

TECHNICAL SKILLS

Languages: Python (primary), Java, C, SQL

AI / ML: Supervised & Unsupervised Learning, Deep Learning (ANN), Computer Vision, Generative AI, LLM Applications, Prompt Engineering, Model Evaluation, Feature Engineering

LLM & Agentic AI: Claude API integration, Agentic workflows, Retrieval/memory pipelines, Agent spend-policy enforcement (x402); currently deepening RAG, MCP and LLM fine-tuning

Backend & Tools: FastAPI, REST APIs, Git/GitHub, CLI tooling, logging, input validation & error handling, Firebase

Libraries: NumPy, Pandas, Scikit-learn, OpenCV, MediaPipe, Matplotlib, Seaborn, Tkinter

Data & Analytics: Tableau, Power BI, MS Excel, SQL

Core CS: Data Structures & Algorithms, debugging, code review basics, 90+ LeetCode problems solved

EXPERIENCE

Artificial Intelligence & ML Intern — Bharat Electronics Limited (Central Research Laboratory)

Jun 2026 – Jul 2026

- Worked on applied AI/ML problems in a defence-aligned R&D environment, contributing to research and prototyping efforts.

Data Analyst Intern — Bluestock

May 2026 – Jul 2026

- Built data analytics workflows and dashboards; developed the Nifty100 Financial Intelligence Platform as part of this role.

Generative AI Intern — IBM SkillsBuild (via AICTE)

Jun 2026 – Jul 2026

- Completed hands-on internship in Generative AI and Cloud Computing covering GenAI fundamentals, prompt engineering and applied AI use cases.

Machine Learning Technical Lead — ACTS-EDC Club, USAR

Feb 2026 – Present

- Lead ML sessions for juniors covering core concepts, algorithms and real-world project implementation.
- Contribute to technical operations, events and student entrepreneurship activities.

FEATURED PROJECTS

CodeSentry — Secure Code Review Tool | Python, FastAPI, Claude API

- Built an LLM-powered secure code review tool with Team Ai-Vengers; reached finalist stage at the NeuroX Hackathon.

VisionMind-AI — AI Vision Agent | Python, Computer Vision, Memory/Retrieval Pipeline

- Built an agent that observes a live environment, remembers past events and answers natural-language questions about them.
- Combined real-time perception with a memory/retrieval layer for context-aware Q&A.

Sentinel402 — Agent Spend Policy Guard | Python, Algorand x402

- Built middleware concept enforcing spend policies on AI agents for the Algorand x402 Agentic Payments Hackathon.

FaceVision — Real-Time Face Recognition | Python, OpenCV, YuNet, SFace

- Built a real-time detection and recognition pipeline (YuNet + SFace embedding matching), optimized for low-latency live video.

ML & DL from Scratch | Python, NumPy, Pandas, Scikit-learn

- Implemented from first principles: Neural Networks, K-Means/Hierarchical/DBSCAN, SVM (hard/soft margin & kernel), AdaBoost, Gradient Boosting, Naive Bayes, Decision Trees, Linear/Polynomial/Ridge/Lasso/ElasticNet.
- Applied to Credit Card Fraud Detection, Heart Disease Prediction, Medical Insurance Pricing and Customer Churn (ANN).

Nifty100 Financial Intelligence Platform | Python, SQL, Full-Stack Web

- Built a full-stack analytics platform with interactive dashboards, financial screening, peer comparison and sector-level analysis.

Binance Futures Trading Bot | Python, Binance API, CLI

- Built a Testnet bot supporting MARKET and LIMIT orders with CLI input, logging, validation and error handling.

AI Virtual Mouse — Hand Gesture Recognition | Python, OpenCV, MediaPipe, AutoPy

- Built a touchless cursor control system with gesture logic for click/scroll and frame smoothing for stable, low-latency control.

EDUCATION

B.Tech AI & Data Science — GGSIPU (USAR) | CGPA 8.14

2024 – 2028

Class XII (ICSE) 92.50%, 2024 | Class X (ICSE) 95.50%, 2022 — Holy Angels Sr. Sec. School, Ghaziabad

CERTIFICATIONS

- AICTE | IBM SkillsBuild Gen AI & Cloud Computing Internship — IBM (Jul 2026)
- NeuroX Certification — CertifyiX (Jun 2026); Getting Started with Generative AI — IBM (Jun 2026)
- Think in Prompt: AI for Analysis & Building Intelligent Tools — Masters' Union (Apr 2026)
- Deloitte Australia Data Analytics Job Simulation — Forage (Feb 2026)

ACTIVITIES & ACHIEVEMENTS

- NeuroX Hackathon finalist (CodeSentry); participant, Algorand x402 Agentic Payments Hackathon and Smart India Hackathon 2025 (internal round)
- Contributor, GirlScript Summer of Code (GSSoC) — open-source program
- Management Team, CSR — USAR Club (teaching underprivileged children and campus workers)
